```
// PHP 8.1
trait VersionDependent {
protected function ensureVersion(): void {
if (self::CURRENT_VERSION < self::MIN_VERSION) {
···throw new Exception (message: 'Current version is too old');
class foo {
use VersionDependent;
  const CURRENT_VERSION = 2.4;
```

```
trait VersionDependentPhp82 {
 protected const CURRENT_VERSION = 2.6;
 protected const MIN_VERSION = 2.5;
protected function ensureVersion(): void {
if (self::CURRENT_VERSION < self::MIN_VERSION) {</pre>
· · · throw new Exception (message: 'Current version is too old');
. . . }
```
