# Type system history

PHP 7.0 added support for scalar types such as string, int, and bool

PHP 8.0 - introduction of Union Types, false

PHP 8.2 - introduction of true, as well as null and false

```php
class Foo
{
    private true $processed;

    public function process(string|int|true $value): true {
        return true;
    }
}
```
